	Joseph Lauture	2819				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR THE MAILING DATE OF THIS COMMUNICA - Extensions of time may be available under the provisions of 3t after SIX (6) MONTHS from the mailing date of this communic - If the period for reply specified above is less than thirty (30) da - If NO period for reply is specified above, the maximum statuto. - Failure to reply within the set or extended period for reply will, Any reply received by the Office later than three months after the earned patent term adjustment. See 37 CFR 1.704(b).	TION. 7 CFR 1.136(a). In no event, however, may a repation. 1 rys, a reply within the statutory minimum of thirty ry period will apply and will expire SIX (6) MONT by statute, cause the application to become ABA	oly be timely filed (30) days will be considered timely. HS from the mailing date of this communication. NDONED (35 U.S.C. § 133).				
Status						
1) Responsive to communication(s) filed o	Responsive to communication(s) filed on 01 July 2003.					
2a) This action is FINAL . 2b)[☑ This action is non-final.					
• • • • • • • • • • • • • • • • • • • •	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4) ☐ Claim(s) 1-25 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-25 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or election requirement.						
Application Papers		·				
9)☐ The specification is objected to by the E	xaminer.					
10)⊠ The drawing(s) filed on <u>01 July 2003</u> is/are: a)⊠ accepted or b)⊡ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 						
Attachment(s)						
1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413) Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date						
 2) Notice of Draftsperson's Patent Drawing Review (PTO-3) 3) Information Disclosure Statement(s) (PTO-1449 or PTO Paper No(s)/Mail Date 8/21/03. 		ormal Patent Application (PTO-152)				

Application/Control Number: 10/612,829

DETAILED ACTION

Specification

The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

The Information Disclosure Statements filed 08/21/03 have been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16, it is unclear what is meant by a (2 N order) resonator. Clarification is required. Is that a 2^N resonator? Clarification is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pellon (US 5,608,400) in view of Abbey (US 6,373,418).

Application/Control Number: 10/612,829

Art Unit: 2819

Pellon teaches in figure (8b) a sigma-delta analog-to-digital converter that includes a resonator (751) having a given phase with a plurality of phase control means to adjust such phase for proper timing (See column 19, lines 18-22), the resonator being coupled between a first node (814₁) and a second node (814₂), and receiving a plurality of clock signals; a quantizer (832) having its input terminal connected directly to the output of the second node, the quantizer having an output terminal; a digital-to-analog converter (838) having its input terminal coupled to the quantizer output terminal, the digital-to-analog converter having its output connected to the first node; and, a first feed-forward stage coupled between the first node and the second node. The system of Pellon further comprises a plurality of feed-forward paths respectively coupled between a plurality of resonators (751) and the second node (814₂).

Pellon does not specifically teach an odd-phase sample-and-hold circuit coupled to a first node of the analog-to-digital converter. However, Abbey (US 6,373,418) teaches in figure (4) a sigma-delta analog-to-digital converter that includes sample-and-hold circuits (400) coupled to the input of a first node of the circuit to hold data prior to processing. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to incorporate the teachings of Abbey into the system of Pellon to improve system performance and reliability because that would eliminate the need for decimation and reconstruction filters (See column 2, lines 10-17). It would have been further obvious implement the resonator with a switched-capacitor circuit including feedback capacitors to further reduce component mismatching in the system

and to filter out the output of the quantizer to remove undesirable frequency components and to adjust the gain of the stages as desired.

Art Unit: 2819

CONTACT INFORMATION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Lauture, whose telephone number is (571) 272-1805. The examiner can normally be reached Monday thru Friday between 9:30 am and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Tokar can be reached at (571) 272-1812. The fax number for the organization to which this application is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (571) 272-1562.
